There's Corn In My Crayons!
Hi! I am Captain Cornelius and this is my friend, Kid Kernel. Kid Kernel would like to show you the super powers of corn.

Kid Kernel, here. Corn is used to make many different things. You can find me having lots of adventures in unusual places! Come along and see!
The corn you eat is called sweet corn. It sure tastes great. Did you know that farmers also grow field corn? They use field corn to feed cows, pigs, chickens, and other farm animals. Field corn is also used to make thousands of products that your family uses.
Rubber tires, plastic toys, batteries, clothes, disposable diapers, and wallpaper are just a few things made with corn! There is probably field corn in your lunch! It is used to make many foods taste better. It also makes corn oil, margarine, and shortening. Potato chips, cookies, cakes, and pies can all have corn in them.
Cornstarch is made from field corn. It makes foods, like gravy, thick and yummy. And baby food, pudding, powdered sugar, and soup all have corn in them!

Joke Time
